ಉಪಾಧ್ಯಕ್ಷರು.—ನೀವು ಆ ಟೈಂನಲ್ಲಿ ಈ ವಿಷಯ ಎತ್ತಿದ್ದರೆ ತಮಗೆ ಅವಕಾಶ ಸಿಗುತ್ತಿತ್ತು. ನಾವು ಮತ್ತೆ ಹಿಂದಕ್ಕೆ ಹೋಗುವುದು ಬೇಡ. ಜೋಷಿಯವರೇ, ತಾವು ಪ್ರಸ್ತಾಪ ಮಾಡಿ.

ಶ್ರೀ ವಿ. ಎಸ್. ಕೌಜಲಗಿ.—ಈ ಬಗ್ಗೆ ಸರ್ಕಾರದವರು ಯಾವ ಕ್ರಮ ಕೈಗೊಂಡಿದ್ದಾರೆ. ಹಾಗೂ ಸರ್ಕಾರದ ನಿಲುಮೆ ಏನು ಎಂಬುದನ್ನು ಹೇಳಬೇಕು. ಇಲ್ಲದಿದ್ದರೆ ನಾಳೆ ಬೆಂಗಳೂರಿನಲ್ಲಿ ಎಲೆಕ್ಟ್ರಿಸಿಟಿ ಇಲ್ಲದೇ ಇದ್ದರೆ ಜನಗಳಿಗೆ ಬಹಳ ತೊಂದರೆಯಾಗುತ್ತದೆ. ಆದ್ದರಿಂದ ಸರ್ಕಾರದ ನಿಲುವನ್ನು ಮಾನ್ಯ ಮಂತ್ರಿಗಳು ದೃಢಪಡಿಸಬೇಕೆಂದು ಕೇಳಿಕೊಳ್ಳುತ್ತೇನೆ.

ನಿಪ್ಪಾಣಿ ನಗರಕ್ಕೆ ಕುಡಿಯುವ ನೀರಿನ ವ್ಯವಸ್ಥೆ ಮಾಡುವ ಬಗ್ಗೆ

SRI SUBHASH JOSHI (Nipani). Due to inadequate rainfall, Nipani City is facing water problem, At present Nipani City Municipality is providing water to the people on alternative days. But some alternative arrangments will have to be made as the Jawahar Water Tank which provides water to the City is having only seven feet of water. To make this arrangement, huge amount is required. So I request the Hon Minister to sanction special fund to Nipani C.M,C. for the supply of water, This I bring to the kind notice of the Hon. Minister for Urban Development.

SRI T. N. NARASIMHA MURTHY.—(Hon. Minister for Housing, Urban Development, Fisheries & Ports).—Medam Deputy Speaker, I would like to make a brief statement on the subject matter raised by hon. Member Shri Subash Joshi .

The main source of water supply to Nippani Town, with a present population of about 50,000 is from Jawahar tank. In addition there are 30 borewells, out of which 14 are fitted with hand pumps and 12 with power pumps. Due to scanty rainfall the Jawahar tank is not getting sufficient water and the discharge in the borewells has also dwindled.

The water in Jawahar tank can last only for another one month even if supply is limited to alternate days. Hence, in order to tide over the present scarcity borewells will be drilled if sufficient rainfall is not received in another fifteen days.

An augmentation scheme for water supply to Nippani town costing Rs. 110.00 lakhs with vedaganga river as source is administratively approved by the Government *nide* G.O No.HUD 214 UMS 89, dated 30/3/1990. The work will be taken up soon under L. I. C. assistntce. This scheme is designed for a prospective population of 65,000 expected in 2011 with *per capila* supply of 113 LPCD (25 GPCD).
